

Virtual Ants start up procedure

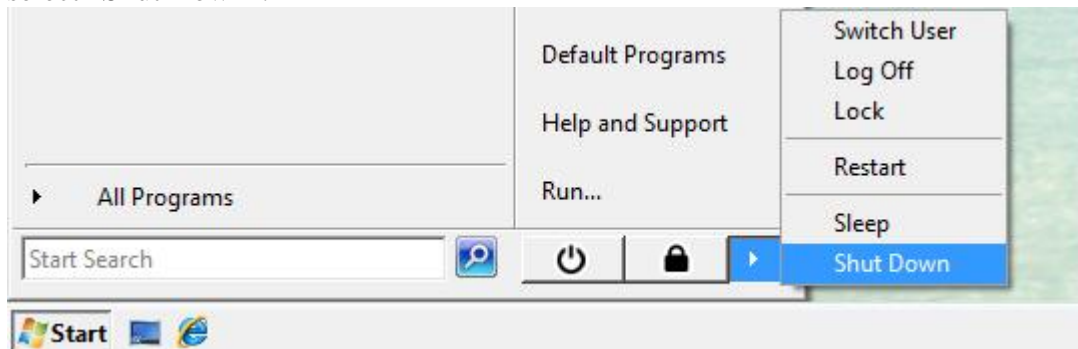

1. Turn on the projector main power switch at the wall.
2. Turn on the computer main power switch at the wall.
3. Push the start button on the computer. The Virtual Ants program will start playing automatically after the computer has started.
4. Make sure computer starts properly and the projector starts displaying the Virtual Ants program.

Virtual Ants shut down procedure

1. Point the projector remote at the front of the projector and push the “OFF” button twice on the projector remote, circled in red in the image below, to power down the projector.

2. At the computer keyboard, press “Alt” + “F4” or “Ctrl” + “Q” to stop and close the Virtual Ant program.
3. Click “Start” and go to the right arrow which will reveal a popup menu and select “Shut Down”.

4. When the computer has fully shutdown, turn off at the wall.

5. When the fans on the projector have stopped spinning, this means the projector has cooled down enough so that you can turn the projector off at the wall.
